

Lactobacillus Reuteri Probiotic: The Multi-Beneficial Strain for Gut, Immune & Systemic Health

[Product Overview]

Lactobacillus reuteri is a highly versatile and well-researched strain, naturally colonizes the gut of humans. Recognized for its unique ability to produce the broad-spectrum antimicrobial substance reuterin, it provides comprehensive support for gastrointestinal, immune, and systemic health. We supply robust and viable Lactobacillus reuteri strains, backed by substantial evidence. To meet diverse formulation needs, we offer two multi-beneficial probiotic strains in two high-potency options: 100 billion CFU, and 200 billion CFU.

[Technical Advantages]

Superior Mucosal Adhesion: High-level colonization and persistence.

Immune & Systemic Health: Clinically-backed immune modulation and broad systemic benefits.

Dual High-Potency Options: Formulations for 100B CFU and 200B CFU.

Reuterin Production: Unique antimicrobial substance reuterin inhibits diverse pathogens.

Human-Sourced Origin: Naturally adapted for human microbiome.

Gut Comfort & Balance: Reduces bloating and supports regular digestion.

[Product Specifications]

Two High-Potency Formula Options

100 Billion & 200 Billion CFU

Choose your desired specification for diverse formulation needs.

[Application Scenarios]

Infant & Children's Nutrition: Clinical support for colic reduction and early gut health.

Oral Health Products: Advanced support for a healthy oral microbiome.

Gut Health & Comfort Supplements: Formulations for bloating and digestive harmony.

Systemic Health Support: Supports diverse metabolic and skin health goals.

Immune Support Formulas: For all ages to strengthen natural defenses.

Research & Advanced Applications: Versatile for diverse studies and products.
