

## Lactobacillus Casei Probiotic Supplement: Digestive & Immune Health

### 【Product Overview】

Lactobacillus casei is a cornerstone probiotic strain, renowned for its exceptional stability and broad-ranging health benefits. As a specialist manufacturer of high-potency probiotics, we offer premium Lactobacillus casei strains designed to thrive in the human gut. This robust bacterium is a key ingredient for dietary supplements targeting improved digestion, enhanced immune response, and overall well-being. To meet diverse market needs, we provide flexible CFU options of 100 billion, 200 billion, 400 billion, and a high-potency 500 billion CFU, all guaranteed for quality and viability.

### 【Technical Advantages】

#### **Exceptional Acid and Bile Tolerance:**

Naturally resilient, our strains survive the harsh gastrointestinal journey to colonize the gut effectively.

#### **Clinically Studied Benefits:**

Our selected strains are backed by scientific research supporting their role in gut health and immune modulation.

**Superior Stability:** Advanced processing and packaging protect against moisture and oxygen, ensuring long-term stability without refrigeration.

#### **Guaranteed Potency:**

Rigorous quality control ensures the labeled CFU count is delivered throughout the product's shelf life.

#### **Versatile Formulation Options:**

Available in four potent strengths (100B, 200B, 400B, 500B CFU) for capsules, powders, and functional food applications.

### 【Product Specifications】

**Four High-Potency Formula Options: 100 Billion, 200 Billion, 400 Billion & 500 Billion CFU**

Choose your desired specification for specific product development goals.

### 【Application Scenarios】

**Dietary Supplements:** Single-strain or multi-strain formulas in capsules, tablets, and stick-packs for daily wellness.

**Digestive Health Products:** Specifically formulated to support individuals with occasional constipation, diarrhea, or abdominal discomfort.

**Functional Food & Beverages:** Ideal for fortifying yogurts, fermented drinks, juices, and nutrition bars due to its stability.

**Immune Support Blends:** Used in supplements aimed at boosting natural defenses for both adults and children.

Customized packaging, carrier bases (like maltodextrin), and private labeling are available. Contact us for a detailed specification sheet and pricing.
