

BACILLUS COAGULANS

The Ultra-Stable, Spore-Forming Powerhouse for Gut Health

PRODUCT OVERVIEW

Bacillus coagulans is a premier, spore-forming probiotic strain that sets the industry standard for stability and efficacy. Encased in a natural protective endospore coat, it survives harsh manufacturing, gastric acidity, and shelf storage with unparalleled viability, delivering live bacteria where they are needed most. Offerings are a highly effective and reliable 100 billion CFU specification.

✓ Natural Spore-Based Resilience

Highly resistant to heat, oxygen, moisture, and stomach acid for superior viability.

✓ Guaranteed Shelf-Life Stability

Drastically reduces spoilage and logistical costs with no refrigeration required.

✓ Targeted In-Situ Germination

Bypasses stomach acid to germinate in the small intestine for potent, direct action.

✓ Dual-Action Postbiotic Effect

Supports gut health via live bacteria and beneficial postbiotics like L-lactic acid.

✓ Single, High-Impact 100B CFU Option

Research-backed dosage calibrated for effective colonization and modulation.

✓ IBS Support Support Formulas

Clinically studied to support regularity and comfort for digestive sensitivities.

Application Scenarios

Dairy & Fermented Foods

Used in yogurt, mozzarella cheese, and other fermented products.

Digestive Comfort Supplements

Supports regularity and comfort in IBS support blends.

Animal Nutrition & Feed Additives

Resilient spores for poultry and livestock feed pellets.

Heat-Processed Functional Foods

Fortifying baked goods, nutrition bars, and hot teas.

Product Specifications

CFU STRENGTHS: 100 Billion CFU

FORMATS: Bulk Frozen Pellets / Lyophilized Powder

OPTIONS: Customized Formats / Comprehensive Technical Support & Private Labeling Services
